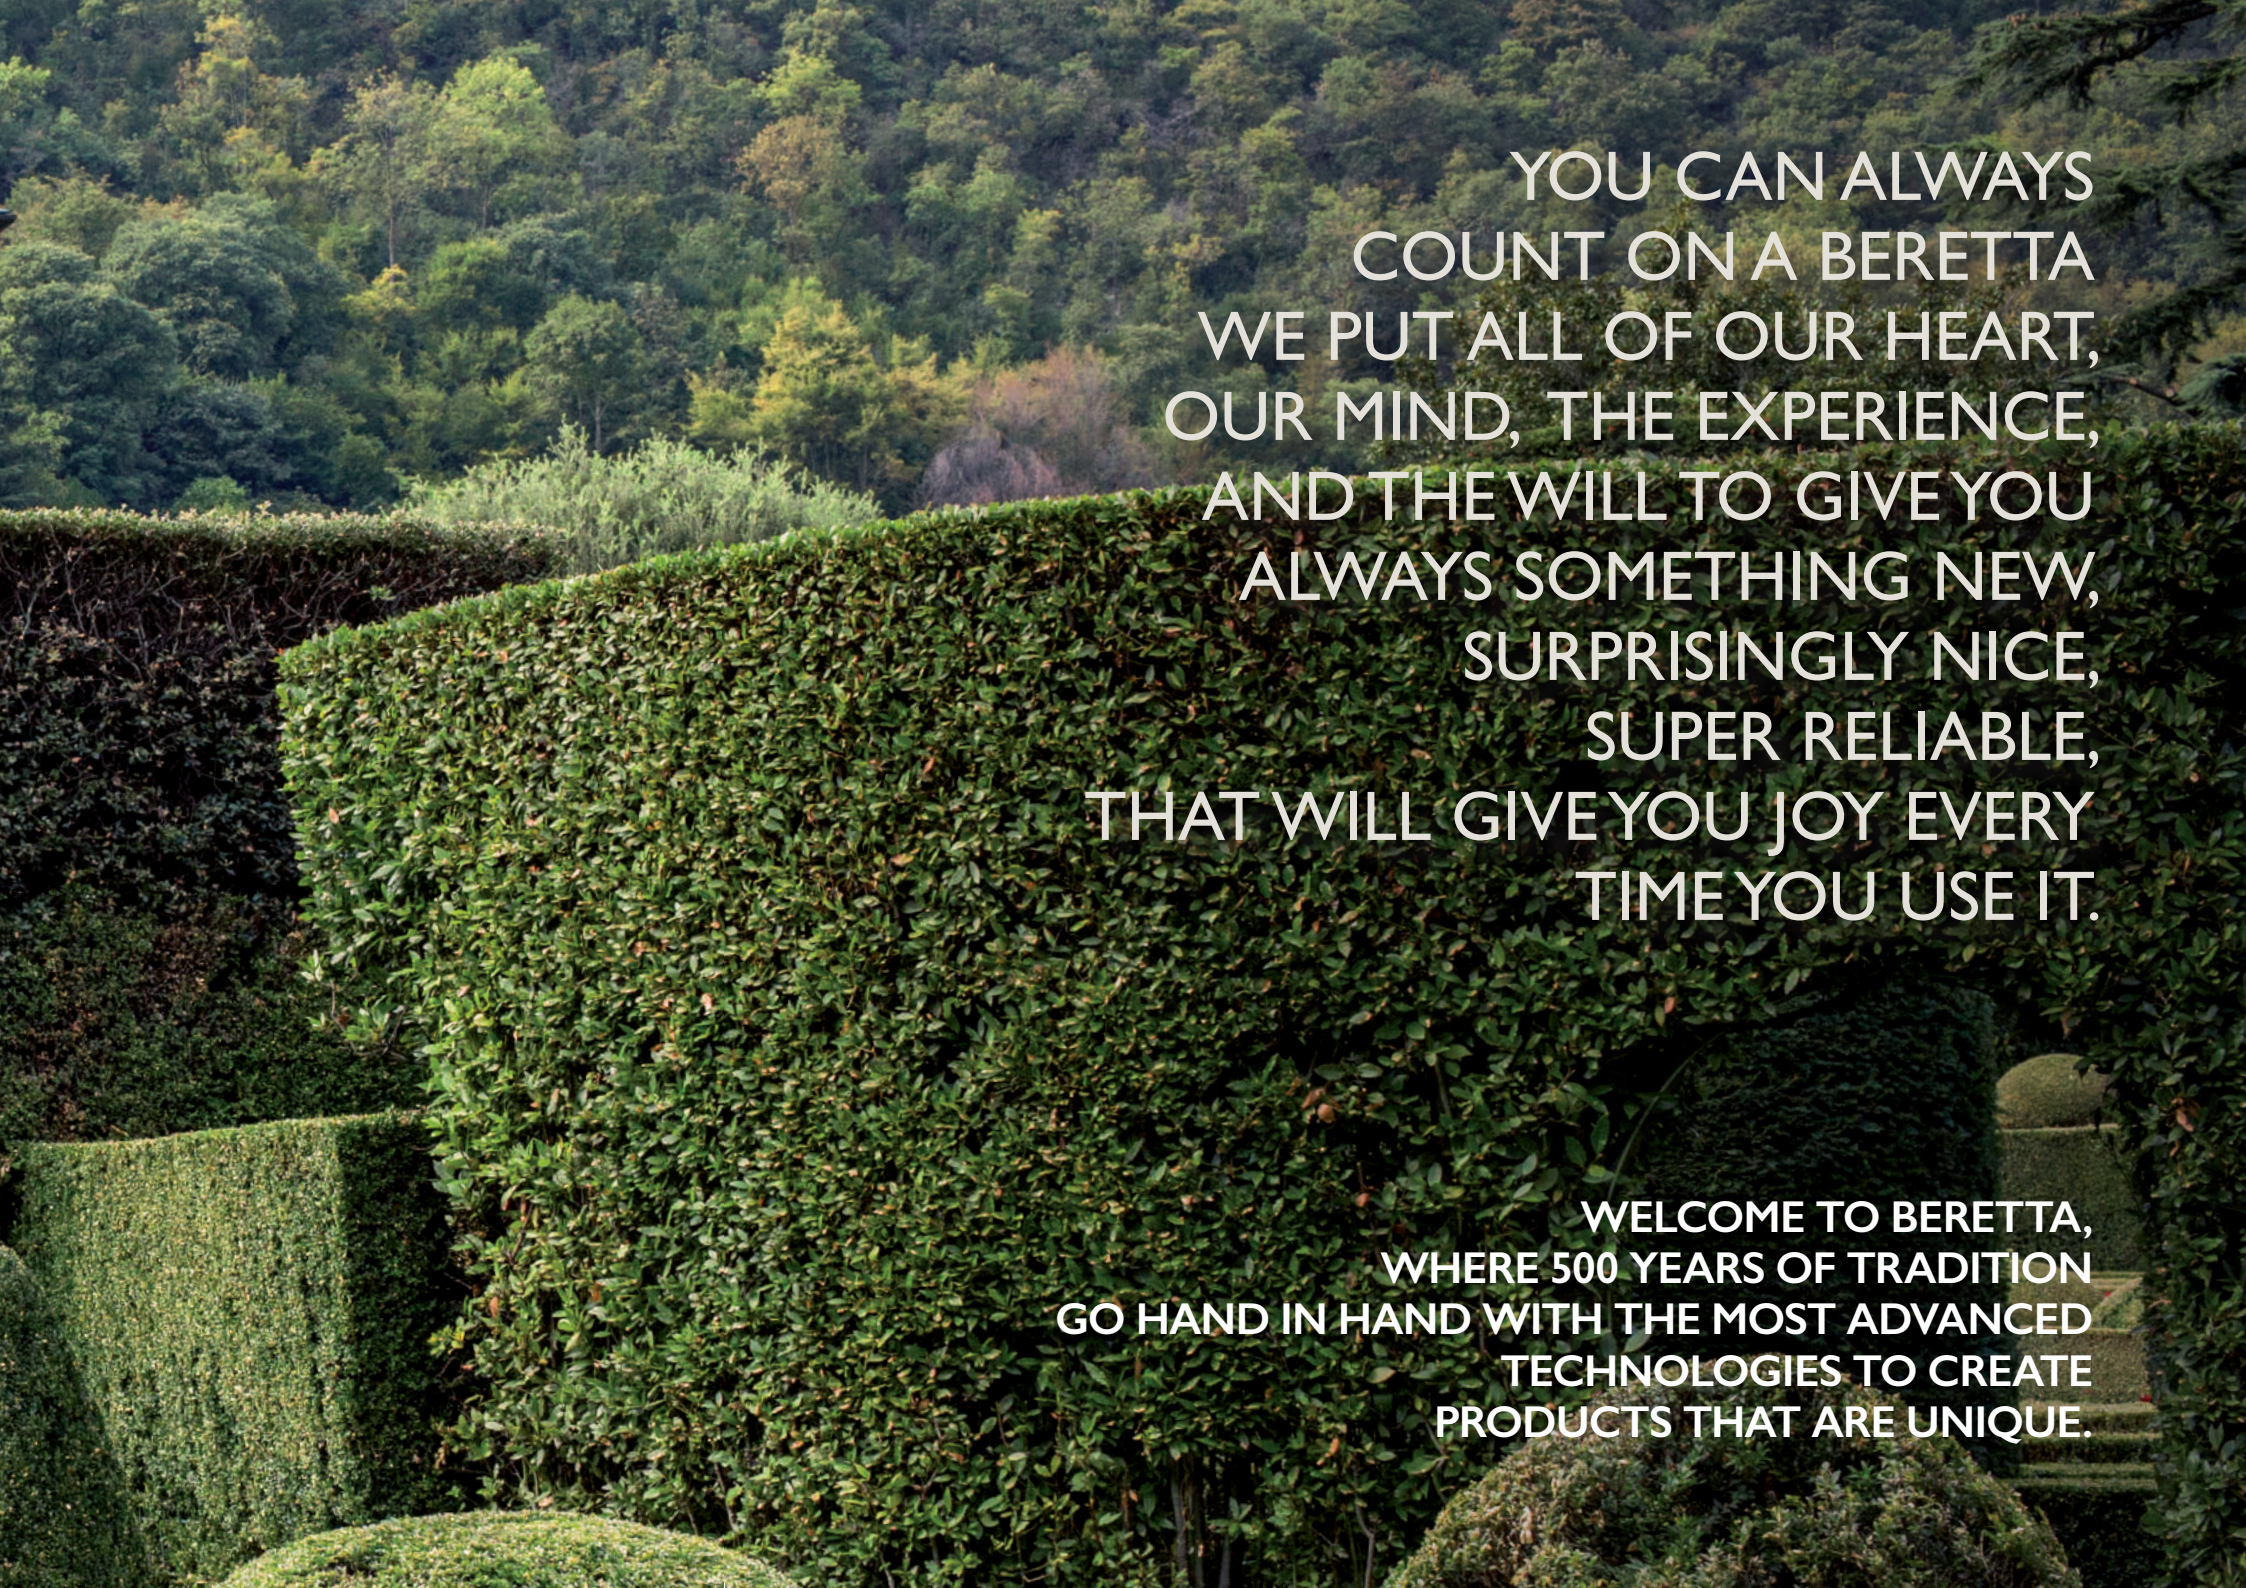
BERETTA

2020 FIREARMS CATALOG



YOU CAN ALWAYS
COUNT ON A BERETTA
WE PUT ALL OF OUR HEART,
OUR MIND, THE EXPERIENCE,
AND THE WILL TO GIVE YOU
ALWAYS SOMETHING NEW,
SURPRISINGLY NICE,
SUPER RELIABLE,
THAT WILL GIVE YOU JOY EVERY
TIME YOU USE IT.
WELCOME TO BERETTA,
WHERE 500 YEARS OF TRADITION
GO HAND IN HAND WITH THE MOST ADVANCED
TECHNOLOGIES TO CREATE
PRODUCTS THAT ARE UNIQUE.

FOR SOME IT'S A GENTLEMEN'S HUNT,
FOR SOME IT'S HANGING OUT WITH BUDDIES.
FOR SOME IT'S A BIG FAMILY,
FOR SOME IT'S A JUST A CREW.
FOR SOME IT'S AN AFTER-WORK GROUP,
FOR SOME IT'S LIKE AN ALUMNI NETWORK.
FOR SOME IT'S BEING IMMERSED IN NATURE,
FOR SOME IT'S SAVORING ITS MOST AUTHENTIC TASTE.
FOR SOME IT'S A CLIQUE OF CONNOISSEURS,
FOR SOME IT'S A 1 MILLION CLICK COMMUNITY ON FACEBOOK.
FOR SOME IT'S A WOMAN THING,
FOR SOME IT'S A FATHER AND SON THING.

BUT ALL TOGETHER, THESE PEOPLE MAKE UP
THE LARGEST FAMILY OF HUNTERS THAT EVER EXISTED.
BECAUSE IT STRETCHES BACK 500 YEARS,
RIGHT TO THE START OF THE BERETTA DYNASTY.
…IT IS THE BERETTA TRIBE.

Optima Choke HP Chokes

686 Silver Pigeon I

Steelium Optima
Bore HP barrels

The 686 Silver Pigeon I is Beretta's most popular over-and-under shotgun of all time. Based on the superb 680 platform, with its unmistakable low, slim action and legendary, ultra reliable mechanism; it won the hearts of shooting enthusiasts the world over. The new version incorporates the perfect ballistics of Beretta's highly reputed Steelium Optima Bore HP barrels. It also features a more defined and lustrous floral engraving, which is further enhanced with images of grapes on the vine and the iconic Beretta Trident logo on both side of the action.
Available in all calibers; 12, 20, 28 and .410; as well as a Sporting version, with or without Beretta's adjustable B-Fast stock.
All of which combines to make the 686 Silver Pigeon I the most elegant, well-balanced and quick-to-shoulder, factory-made shotgun in the world.

Ultralight

Ultralight Classic

Ultralight Gold

Fully featured 12 ga shotguns weighing in at less than a typical 20 ga. The Ultralight's receiver is machined from a single block of remarkably strong aircraft quality aluminum alloy, specially heat treated to deliver the strength and durability of steel, but with 65% of the weight.

Model	Gauge	Chamber (mm)	Barrel (cm)	Rib (type)	Chokes (type)	Accessories	Drop (mm/mm)	Cast	Pad
Ultralight Classic	12	70	62-67	6x6	MC	5 Chokes	35/55-38/60	RH-LH	Plastic

Ultralight Gold	12	70	62-67-71	6x6	MC	5 Chokes	35/55-38/60	RH-LH	Rubber

691

691

The 691 is an elegant, smooth shooting boxlock shotgun. Beautifully finished, the stock is manufactured from specially selected 2.5 grade walnut, which has been further enriched by Beretta's enhanced oil finishing process. Additionally, the receiver features an unique, floral scroll engraving creating a really handsome gun.

Model	Gauge	Chamber (mm)	Barrel (cm)	Rib (type)	Chokes (type)	Accessories	Drop (mm/mm)	Cast	Pad

691	.410	76	66-71-76	6x6	MC	5 Chokes	35/55	RH-LH	MicroCore®

693

693

The traditional Beretta over and under has been combined with the highest technology to create this well-balanced, elegant shotgun. The stock is manufactured from specially selected high grade walnut and it is oil finished. The action is a modernised development of the tried and tested 680 series. Additionally, the receiver is Nistan finished with exquisite, game scene engraving. Re-engineered Steelium barrels guarantee absolute precision while minimising weight and felt recoil, creating a jewel of a gun.

BERETTA

THE 9 REASONS TO CHOOSE THE BERETTA SEMI-AUTO TECHNOLOGY

1 **PERFECT PATTERNS ON EVERY SHOT.**
The ingredients of the great accuracy of the Beretta Steelium barrels are: the exclusive tri-alloy Beretta Steel (Ni, Cr, Mo), the deep drilling, the cold hammering process and the vacuum distension. Every OptimaBore HP barrel profile has been specifically designed and tested to provide perfect accuracy with every type of shells: lead, steel and steel High Performance.

2 **THE BEST RECOIL REDUCTION.**
Kick-Off, Kick-Off ^{3} and Kick-Off Mega ensure you up to 70% recoil reduction giving you more stability, comfort and control for faster target acquisition. More comfort for you, especially when you enjoy shooting hundreds of shots in a single day, and enhanced durability.

3 **UNBELIEVABLE RELOADING SPEED (+36%).**
The Beretta gas-operated system is fast like an eye's blink. That's why it's called B-Link. The power of the gas-system, combined with the precision of the rotating bolt, ensure you a fast, reliable and smart cycling. You can spend all your magazine's cartridges before the 1st round touches the ground.

4 **ALL-LOAD PROVEN RELIABILITY, FROM 24 G. TO 64 G.**
Beretta gas-operating system B-Link is world's most reliable system. The closing force is stronger because, when the reloading cycle begins, the energy available to unlock the bolt is significantly higher. Higher energy when opening allows higher closing force, preventing the bolt to unlock when it is not supposed to do it.

5 **COMFORT AND EASY TO ASSEMBLE.**
The MicroCore® pad is softer than gel, lighter than rubber and perfectly slipping. It's available in several dimensions to customize your length of pull. The green magazine cap allows a quicker and better safety check on the shotguns magazine. The B-Lok cap, the magazine cap exclusive to Beretta, ensures a perfect and secure closing with just 60 degrees of rotation instead of multiple turns.

6 **CLEANER THAN EVER AND EASIER TO CLEAN.**
With B-Link, the only weak point of the gas-operating system has been practically reduced to zero. The re-engineering of gas ports and the systematic reduction of all the mechanical frictions reduce dirt to the minimum terms. You will experience the lowest maintenance need ever, and a smart, easy, fast and secure cleaning.

7 **LOWEST MUZZLE JUMP.**
Beretta semi-auto shotguns give you the lowest muzzle jump ever combining the stunning recoil reduction of the Kick-Off devices to the unique ballistic features of the Steelium OptimaBore HP barrels. More control after each shot, better performance for each next one.

8 **ERGONOMIC AND EASY TO OPERATE.**
The extended bolt handle and bolt release low profile lever allow for easier manipulation during the coldest and rainiest days. An enlarged loading port facilitates an easier and quicker reloading. The new extended lifter avoids thumb bite or glove catch while loading the gun.

9 **DESIGNED FOR THE FUTURE, NEVER FORGETTING TRADITION.**
The Beretta in-house design team works every day to match design with functionality, giving you original and aesthetically beautiful, simple solutions that optimize the shape, weight and ease of use.

A 300 Outlander

A300 Outlander Silver

A300 Outlander

The A300 Outlander is the latest evolution of Beretta's 300-series gas-operated semi-auto shotguns, which have been sold to millions of hunters and sportsmen around the world.
And there's a reason for their popularity: unbeatable performance as well as great value out of the box.

A 400 LITE

A400 Lite Synthetic

A400 Lite Synthetic LH

The Beretta A400 Lite Synthetic is a hunting shotgun that does it all, and that doesn't mind playing hard and getting dirty. It's a 3" semi-auto shotgun combining the Kick-Off Plus shock absorption with the brand new GunPod 2, the unrivalled Beretta Steelium barrel and a great package of smart, lightweight polymeric solutions. Fast, versatile, light and low-recoiling, the A400 Lite Synthetic is also self-cleaning, requiring much less maintenance than you can expect. The new A400 Lite Compact is designed to "grow" with the young shooters, featuring a set of spacers and a barrel extension.

Xtreme preparations, Xtreme conditions, Xtreme expectations.
The new A400 Xtreme Plus is built to go wherever your hunt takes you. Engineered to be the softest-shooting, most reliable 3.5" waterfowl shotgun out there, and to withstand the toughest waterfowl environments.
It has the best recoil reduction system in the world, combining the Kick-Off Mega and Kick-Off[3] together with the new Soft Comb, which reduces the felt recoil imparted to the shooter's cheek even further. It features the best barrel technology drawing from the Olympic competition world, Beretta's exclusive Steelium Plus barrels, providing the best possible patterning from all hunting loads. An extended charging handle and bolt release from the factory allow for easier manipulation during the coldest and rainiest days.
An enlarged loading port allows for ease of loading.
The new A400 Xtreme Plus shoots always, shoots everything and shoots even better!

Based on the 690 platform, Vittoria shotguns feature a dedicated ergonomics,
suited to those with a shorter stature, to ensure a smooth, comfortable and precise handling.
These guns are fitted with a shortened, semi-Montecarlo style stock, have a reduced pistol grip and additionally
are completed by a 1 mm checkering, derived from the premium guns, beneficial for smaller hands.
The Sporting version has ventilated side ribs.

Evolution of the tried and tested 680 series, the 690 shotguns boast a wide Nistan finished receiver, with exquisite game scene engravings. The Steelium barrels guarantee absolute precision, with dense patterns, while minimising weight and felt recoil. The stock is processed from high quality walnut wood, carefully selected and oil finished.

Designed and tested in collaboration with the Beretta Shooting Team, 694 is the new under and over platform designed specifically for clay pigeon shooting, and with a precise objective in mind: to help shooters increase their success rate. Thanks to a meticulous mechanical and ergonomic design process, the 694 represents a perfectly balanced over and under field gun. Natural and immediate when shouldering, it features a precise swing and it is easy to control. The new shape of the action and the stock provide increased field of vision, while the new forend iron system allows the user to maintain the opening load constant over time, and the Steelium Plus barrels guarantee a dense, uniform pattern every time. The slim, modern design lends the 694 a "racing" feel, for a bold, winning look.

DT 11

DT11 Sporting

With DT11, balance, power and precision are in your hands, together with outstanding control and perfect trigger pull. The innovative Steelium PRO barrels ensure great pattern and reduced muzzle raise, while the wide receiver improves stability and ease of handling. The B-Fast adjusting devices provide the best ergonomics ever.

DT 11 GOLD

DT11 Gold

Created to celebrate the DT11's many successes, not least its cachet of medals at the last Olympics! The DT11 Gold, is a limited-edition version of Beretta's spectacular competition shotgun. The silver receiver is embellished with gold-plated decorations; the familiar blue line around the action is replaced with a gold-plated version, as is the iconic trident logo on the bottom of the receiver. The fences are embellished with a repeated engraving of the word 'gold' forming a textured finish that reduces the light reflection when shooting. The DT11 Gold has been made in two specifications, relating to two Olympic disciplines. With only 250 of the trap model available and 75 of the skeet version; all limited edition shotguns will be numbered on the underside of the receiver.

DT11 Black Edition EELL Sporting

The EELL version of the DT11 Black Edition brings the use of carbon fiber to levels never reached before in the firearms world. In addition to the top rib, the trigger plate, and the trigger group, the Beretta DT11 Black Edition EELL over and under shotgun also features carbon fiber trigger guard and two innovative long side plates, in which the engraving gives way to the characteristic carbon fiber twill texture. The stock, made of selected grade 4 walnut wood, is available in an adjustable, fixed or headed version. The oil finishing provides the wood with higher water resistance. The hand made 1 mm checkering gives the stock a more refined look and a firm and comfortable grip.

1301 Comp Pro

After gaining the podiums of the Shotgun World Championships with its incomparable cycling speed, the 1301 Comp evolves in the Pro version, incorporating the improvements suggested by the multi-rated Beretta shooters. With the comfort, stability and ease of shouldering of the new stock, its super-fast, safe and easier loading system, the new enlarged bolt release button and bolt handle and the Beretta by Tony System extended magazine for 10 + 1 cartridges, the 1301 Comp Pro is today the most competitive platform for practical shooting, already in its out-of-the-box configuration, yet allowing further personalization, so sought after by the most demanding shooters.

92X PERFORMANCE

The 92X Performance: accuracy, power and speed the #1choiceofchampions way. The new Beretta handgun specifically designed for competition does not accept compromises and aims to top performances, by bringing on the shooting ranges one of the most reliable locking systems ever, along with a full steel vertec frame, a heavier Brigadier slide and the new surprisingly fast and crisp trigger mechanism Extreme-S.

FUSION

The 92 FS Fusion Blue is a new Limited Edition, reinterpretation of the iconic 92FS. It's the result of a careful design aimed at creating the perfect balance between tradition and innovation. The name celebrates this "fusion" of different materials and the most modern technologies available with the craftsmanship that made Beretta Premium Guns so famous worldwide. The result is a gun with an extremely contemporary design and rich in fine details. The barrel, all the levers and screws are chromed and hand-polished, mirrored to create a contrast with the blue finish of the frame and the slide. Compared to military standards that require a 160 mm maximum H + L, the Fusion Blue expresses its highest level of accuracy in the selection and treatment of barrels, guaranteeing its H+L ranges from 60 to 70 mm. An exclusive series of only 100 pistols, 60 in caliber 9x19 and 40 in 9x21. Every pistol is numbered progressively and offers a truly exclusive detail: the pistol number coincides with its dedicated serialization.

FUSION

The Fusion Blue features a dedicated case in light gray carbon fiber, with internal Alcantara® lining and contrasting orange stitching. Personalized with the coined Pietro Beretta shield, it is equipped with a safety lock. The kit includes a second magazine, a cleaning kit with a light gray carbon fiber multifunction handle, a dedicated screwdriver to remove the exclusive screws of the grips and a congratulatory card in ferromagnetic steel with the serial number and the autograph by the President Franco Gussalli Beretta.

APX

Large front and rear serrations on the slide

Easy and quick disassembly

Ambidextrous slide catch lever

Automatic striker block safety with deactivation device

Rounded, snag free slide for a trouble-free carry and draw from the holster

Picatinny rail for convenient mounting of accessoies

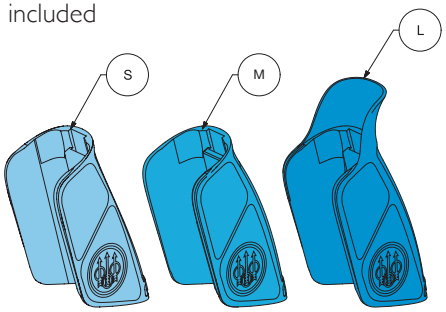
APX

Squared-off trigger guard

Trigger safety and constant action shooting system with 6 lb. trigger weight, clean break and 3 mm tactile reset

Large and reversible magazine release button

3 ergonomic and modular backstrap included



Serialized chassis with interchangeable grip frame available in different colors and configuration

APX

APX Tactical

Specifically designed for military and law enforcement operators, the APX has been put through extensive testing and evaluation by professionals. The result is a pistol that delivers superior performance in durability and reliability, ergonomics, trigger, and modularity. Utilizing a removable, serialized chassis frame, the APX can be easily modified with replaceable grip frame housings and it is simple to disassemble and maintain. Each APX comes with 3 interchangeable back straps so users can best fit their hands and preferences. The APX's aggressive full length slide serrations make slide manipulations easy under any conditions. To accommodate right or left-handed use, the APX's magazine release button can be easily reversed, and the slide stop is ambidextrous. The APX's trigger breaks at 6lbs and has a clear tactile and audible very short reset.
The APX truly is the ultimate striker fired pistol from Beretta.
Now available in different colors and in the new RDO and Combat versions.

APX

APX RDO

APX Combat

The APX RDO is an evolution of the APX full size featuring all the same modularity of the standard APX line with the addition of a factory slide cut to accept one of 4 different optic plates. At launch, the pistol plates support Mini-Red Dot Optics from Burris, Trjicon, Leupold, and C-More. Also shipping with the pistol is a fixed blanking plate that covers the slide cut and allows the pistol to be used without optic mount. The APX Combat incorporates all the features of the RDO version, offering in addition a factory installed 1/2x28TPI Threaded barrel.

APX

APX Centurion

APX Compact

The APX Centurion and APX Compact pistols extend the proven APX Series to a concealed carry friendly size, for those who have a need to carry concealed but want similar handling characteristics to their duty pistols. Both the pistols feature a removable serialized chassis allowing the frame to be easily modified. Replaceable backstraps are also available to further customize the pistol ergonomics. These compact pistols keep offering the core characteristics that you love from your APX: low bore axis, ambidextrous slide catch, reversible magazine release, aggressive slide serrations, and a really smooth trigger with a clear tactile and audible short reset.

Px4

Absolute durability, reliability, and ergonomics have made it the go-to choice for shooters around the world. Designed to meet the most stringent military standards of durability, the PX4 has been reported to fire well over 150,000 rounds with zero part breakage.

The lines of the pistol are snag-free and make unholstering and reholstering easy and fluid. The pistol may be adapted to different hand sizes and shooting styles thanks to a modular design with interchangeable backstraps. The ambidextrous and reversible controls offer the possibility to easily train or shoot with either hand.

Besides being one of the strongest actions available, the rotary barrel dissipates recoil away from the shooter's hand and greatly reduces muzzle jump, making it an extremely fast and accurate action. Disassembly is designed to allow for quick field stripping.

M9A3

M9A3

With the M9A3 semi-auto pistol series, Beretta has created a coming-together of all the tactical and functional features that today's combat professionals may require. From Vertec-style thin grip for instinctive pointability, to universal slide design convertible from safety-decocker to decocker-only, from a bevelled magazine well to oversize mag-release button, from a 3-slot built-in Picatinny rail to high-capacity capability for maximum firepower.
These combat pistols were designed to be perfect for any tactical use, including home and personal defence, tactical competitions as well as duty carry in any condition.

M9A1
Compact Black

Developed to meet the demanding requirements of the US Corps, the M9A1 incorporates the established reliability and performance of the M9, with added features needed for the ever-changing missions of peacekeeping forces. Thanks to its accuracy, durability and versatility, it also makes a superb choice for personal or home defense as well as concealed carry.
The M9A1 is built to be ultra-tough and always dependable. Besides the superior steels of which it is constructed,
it also features a unique sand-resistant magazine and a special PVD coating. At the range, the M9A1 will impress you for its low recoil, as well as its accuracy.

90 Series

92 FS

The Beretta 92FS has been setting the standards for best military, police and tactical pistol for over a quarter century.
The reason is that it was designed, and has kept evolving to be and remain the most accurate, durable and reliable semi-auto handgun on the market. Easy to use, absolutely safe and delivering impressive firepower, it remains the sidearm of allied forces the world over, as well as of countless police and law-enforcement agencies.

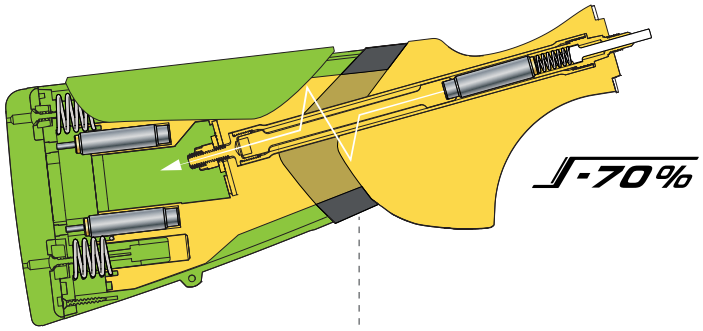
1301 Tactical Inox / Marine

The 1301 is Beretta's new gas operated semi-automatic shotgun engineered to be ultra-reliable and easy to use. Thanks to its compact size, it is ideal for negotiating tight spaces. It has all the features that a modern tactical shotgun should offer and it is easily adaptable to most users' needs, body type and shooting posture. Right out-of-the-box, the 1301 Tactical features an oversized charging handle, large textured bolt release and an oversized reversible safety button. The integrated B-LINK gas operating system, featuring a cross tube gas piston, allows the 1301 Tactical to cycle 36% faster than any other shotgun on the market. This also makes it ideal for 3-gun competitions.

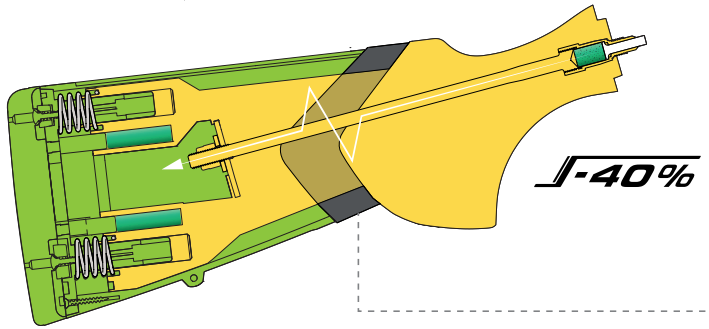
BERETTA KICK-OFF SYSTEM
WORLD'S BEST RECOIL AND MUZZLE RISE REDUCTION

KICK OFF M



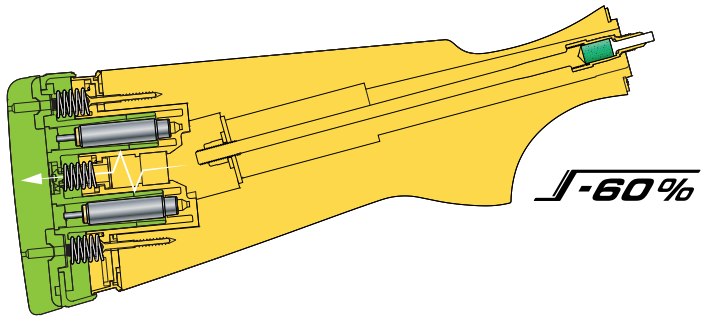
Kick-Off Mega is the most powerful recoil reduction system available today, ideal for 89 mm chambered shotguns, especially when you enjoy shooting high loads and hundreds of shots in a single day. It effectively combines 3 different devices that work synergistically, reducing the perceived recoil by up to 70%, ensuring greater stability, better control and faster target acquisition. Two hydraulic shock absorbers, similar to those used in the automotive and aerospace industry, positioned close to the rubber insert, together with return springs, effectively act on the first recoil peak. A third hydraulic shock absorber, inserted in the tie rod, acts on the second recoil peak caused by the impact of the slide against the receiver, further reducing the muzzle rise effect and the vibrations caused by the movement of the slide.

KICK OFF PLUS



Kick-Off Plus consists of two elastomer shock absorbers, positioned close to the rubber insert and equipped with return springs, which effectively act on the first recoil peak, reducing its perception up to 40%. A third elastomer shock absorber, inserted in the tie rod, absorbs the impact of the slide against the receiver, reducing the second recoil peak, the muzzle rise effect and the vibrations caused by the movement of the slide.

KICK OFF



Kick-Off is the first recoil reduction system developed by Beretta using hydraulic shock absorbers similar to those used in the automotive and aeronautical industries. It consists of two shock absorbers inserted close to the butt plate, completed by return springs, which effectively act on the first recoil peak, reducing the perceived recoil up to 60%.
A third elastomer shock absorber, inserted in the tie rod, acts on the second recoil peak caused by the impact of the slide against the receiver, further reducing the muzzle rise effect and the vibrations caused by the movement of the slide.

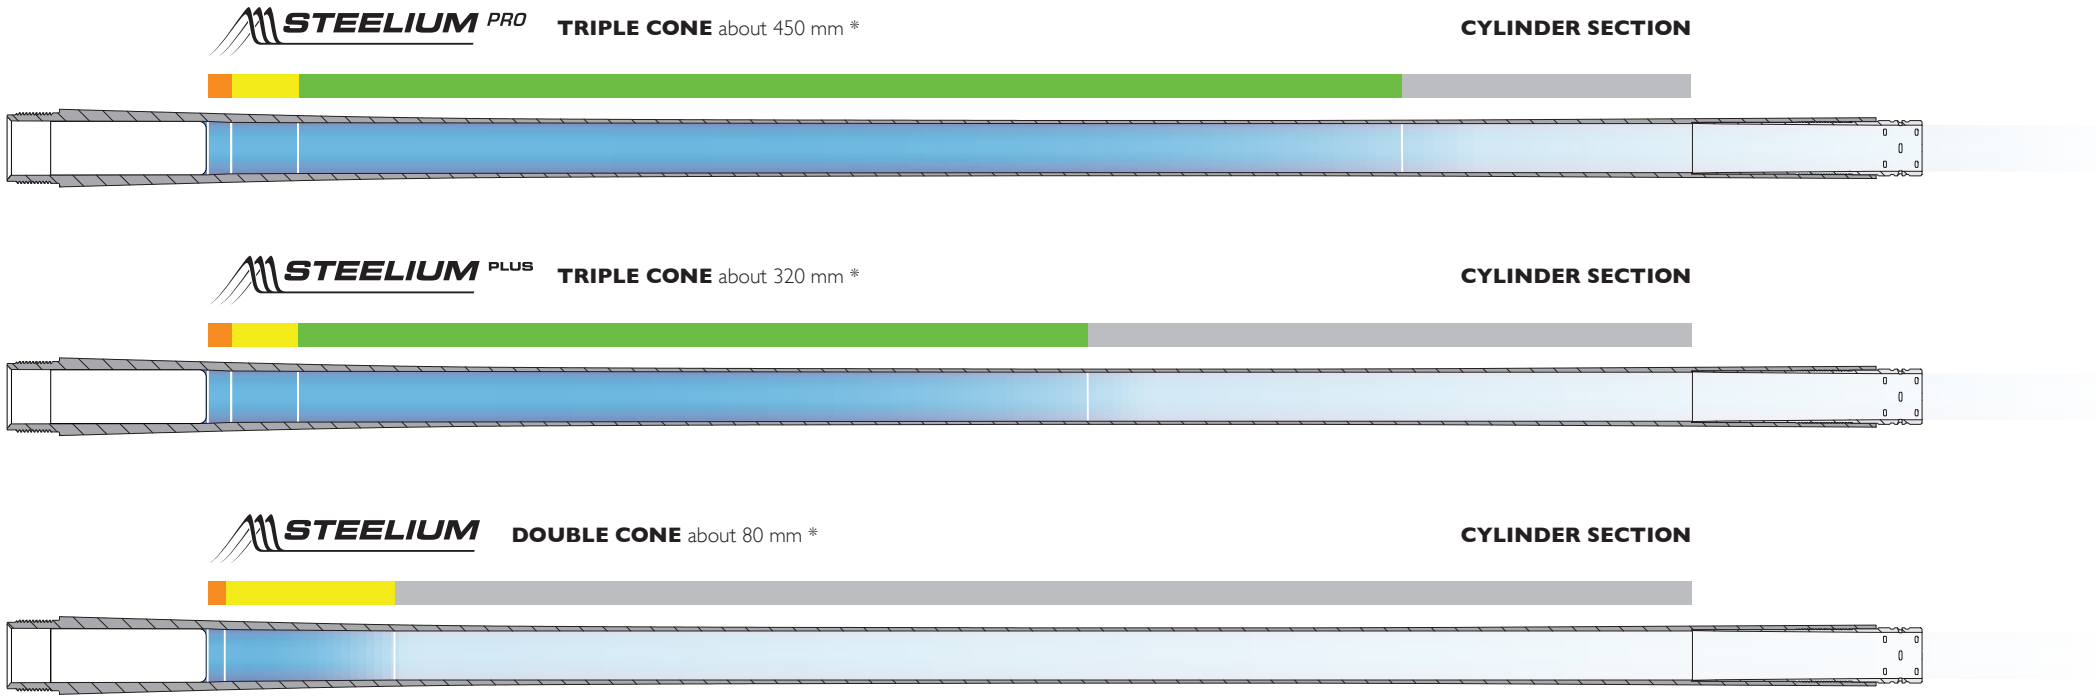
B STEADY

The **B-Steady** system divides the stock into two sections: stock and pistol. The point of absorption of the recoil is in an advanced position, integral with the pistol, which is free to move back, leaving the stock stable and avoiding the annoying sliding of the nose piece on the cheek. The face remains firm and perfectly steady on the stock, without ever losing the line of sight.

FIXED PART MOBILE PART

STEELIUM BARREL

THE BEST BALLISTIC PERFORMANCE ON THE MARKET



The ingredients for the stunning performance of the Beretta **Steelium barrels** are: the exclusive tri-alloy Beretta steel (Ni, Cr, Mo), the deep drilling, the cold hammer forging, the vacuum distension and the 80 mm extended forcing cone. The inner profile of the OptimaBore HP barrels has been designed and tested to provide perfect accuracy with every type of shells: lead, steel and High Performance steel. This results in perfect patterns on every shot.

The **Steelium Plus** barrels have a triple forcing cone that reaches a length of 320 mm (in a 76 cm barrel). In **Steelium Pro** barrels, the length of the forcing cone is further extended, up to 450 mm (in 76 cm barrels). This progressive inner profile of the barrel provides smoother shot with reduced muzzle rise and guarantees perfect, dense and uniform patterns with any type of ammunition.

* The indicated lengths are based on 76 cm barrels.

LEGAL NOTES: while every effort has been made to make this catalog as complete and accurate as possible, changes may occur at any time in the illustrations, descriptions, colors shown, and technical specs listed. Beretta provides ongoing improvements to its products and consequently, all specifications can vary without notice.
